INTRODUCTION

Publication of these abstracts was prompted by requests from South Dakota businesses and governmental divisions for updated information on South Dakota and its communities. Individual abstracts are presented for the following: 1) the state of South Dakota (Table I), 2) each of the 66 counties in South Dakota (Table II), and 3) cities in South Dakota with current populations of 500 or more, 131 in total (Table III).

Appendix A lists the sources used to compile the data included in the individual abstracts, and Appendix B is a glossary of terms. The glossary defines various terms, and interprets their application within the abstracts. An explanation of the symbols used is also located in the glossary. Appendix C contains selected maps of South Dakota, depicting various boundaries and divisions established within the state.

Information included in this publication was updated and organized by Mary Pryor, Graduate Assistant for the State Data Center. Special thanks go to Tonya Meaney and Pam Poppen for their help in completion of this project. Please direct any comments, suggestions, or recommendations regarding this publication to: DeVee Dykstra, Director, State Data Center, University of South Dakota, 414 East Clark Street, Vermillion, SD 57069.

APPENDIX B

GLOSSARY OF TERMS & EXPLANATORY NOTES

APPENDIX B

Glossary of Terms and Explanatory Notes

Symbols Used

[--] - The information does not exist.

[N/A] - The information exists but is not available due to federal and state law confidentiality requirements.

[N/R] - The information exists but has not been reported.

(D) - The data is not shown to avoid disclosure of confidential information.

(L) - Less than 10 persons are employed in a particular industry.

Definitions and Explanatory Notes

Assessed Valuation Less Exemptions - Total taxable value of the county listed. Tax levies are based on the total assessed value of all county property, less any exemptions (non-taxable property).

Asset - An asset is a resource controlled solely by an organization that is expected to provide future economic benefits.

Average Daily Membership - Average daily membership pertains to the average number of students enrolled per day in the school district. The A.D.M. for K-8 summed with the A.D.M. for 9-12 may not equal the total A.D.M. due to rounding.

Average Family Income - The average family income is the amount obtained by dividing the sum of the total income of persons 15 years old and over by the number of families in the population.

Births - The number of births in a county is determined according to mothers' county of residence. The birth rate is the number of births per 1,000 population in the county.

Building Permits - Building permit statistics are based on annual reports submitted by local building permit officials in response to a mail survey.

Offices & mercantile buildings - This building permit classification includes offices, banks, professional buildings, services stations, repair garages, stores and other mercantile buildings.

Hospitals, Public Works, & Schools - This building permit classification includes hospitals, institutional buildings, public works, utilities, schools and other educational buildings.

Other Non-Residential Buildings - This building permit classification includes amusement and recreational buildings, churches and religious buildings, other non-residential buildings, and any other non-housekeeping shelters. This classification does not include structures other than buildings.

Business Establishment - A business establishment is a single physical location where business is conducted, or where services or industrial operations are performed.

Civilian Labor Force - The civilian labor force includes all persons 16 years old and over, classified as employed or unemployed. Persons not in the civilian labor force include those persons on active duty with the United States Army, Air Force, Navy, Marine Corps or Coast Guard, as well as persons 16 years old and over who are classified as "not in the labor force." This category consists mainly of students, home-makers, retired workers, seasonal workers enumerated in an "off" season who were not looking for work, inmates of institutions, disabled persons, and persons doing only incidental unpaid family work (less than 15 hours during the reference week).

Current Asset - Current assets are assets that an entity expects to use or convert into cash within one year.

Current Liability - Current liabilities are obligations that must be repaid within one year.

Deaths - The number of deaths in a county is determined according to the county of residence of the deceased. The death rate is the number of deaths per 1,000 population.

Divorce - The number of divorces are determined according to the county of occurrence. The divorce rate is the number of divorces per 1,000 population.

Education Level Completed - Education level completed refers to the highest grade successfully completed. This applies to progress in schools defined as a nursery school, kindergarten, elementary school, and schooling which leads to a high school diploma or a college degree. Schooling in trade or business schools, company training, or schooling obtained through a tutor is included only if the course credits were regarded as transferable to a regular elementary school, high school or college.

Employed - Those persons classified as "employed" include all civilians 16 years old and over who are either "at work" or "with a job but not at work". "At work" persons includes a) those who did any work at all during the reference week as paid employees, b) those who did work in their own business or profession, or on their own farm, or c) those who worked 15 hours or more as unpaid workers on a family farm or in a family business. Persons who are "with a job but not at work" include those who did not work during the reference week but had jobs or businesses from which they were temporarily absent due to illness, bad weather, industrial dispute, vacation, or other personal reasons.

Employment by Industry - Industry categories are based on 1972 Standard Industrial Classification codes.

Equity - Equity is the net worth of an entity or jurisdiction.

Expenditure - An expenditure is the act or process of paying out.

Government Expenditures - Government expenditures include all amounts of money paid out by a government, other than for retirement of debt, investment in securities, extension of credit, or as agency transactions. This includes only external transactions such as the provision of perquisites or other payments in kind. Government expenditures are net of recoveries and other correcting transactions.

Total Expenditures for Education - Total expenditures for education include expenditures for instruction, support services, community service, non-programmed debt service and co-curricular activities for the general fund and the special education fund.

Family - A family consists of a householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption. All persons in a household who are related to the householder are regarded as members of his or her family.

Family Income - Family income is the combined incomes of all family members 15 years old and over.

Fixed Assets - Fixed assets are assets that are expected to yield economic benefits to an organization for longer than one year or one operating cycle.

General Obligation - General obligation pertains to bonds issued for any authorized corporate purpose.

Household - A household includes all the persons who occupy a housing unit. A housing unit is a house, an apartment, a group of rooms, or a single room that is occupied (or if vacant, is intended for occupancy) as separate living quarters. Separate living quarters are those in which the occupants live and eat separately from other persons in the building and have direct access from the outside of the building or through a common hall. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements.

Household Income - Household income includes the income of the householder and all other persons 15 years old and over in the household, whether or not related to the householder.

Income - Income is the algebraic sum of the amounts reported separately for wage or salary income; non-farm net self-employment income; farm net self-employment income; interest, dividend, net royalty or rental income; Social Security or Railroad Retirement income; public assistance or welfare income; and all other income.

Receipts from the following sources are not included as income: money received from the sale of property (unless the recipient was engaged in the business of selling such property); the value of public housing subsidies, medical care, employer contributions for pensions, etc.; withdrawal of bank deposits; money borrowed; tax refunds; exchange of money between relatives living in the household; gifts and lump-sum inheritances, insurance payments, and other types of lump-sum receipts.

Industry - An industry is a distinct group of productive enterprises. The industry classification system consists of 231 categories classified into 13 major industry groups. The industry classification system is based on the "Standard Industrial Classification Manual" (SIC).

Liability - Liabilities are dollar amount representation of assets provided by creditors and claims of the creditors against an entity's assets.

Long-term Liability - Long-term liabilities are liabilities that will not be repaid within the next year.

Marriages - The number of marriages in a county is determined by the place of occurrence. The marriage rate is the number of marriages per 1,000 population.

Median - The median is the value that falls in the middle when a group of values are arranged in ascending order.

Median Age - The median age is the number which divides the distribution of ages into two equal groups, one including ages above the median and one including ages below the median.

Median Family Income - Median family income represents the median income for 4-person families in the state abstract only. For counties and communities, family median income represents the median income of all families in the area regardless of family size, including those with no income.

Median Income - Median income is the amount which divides the distribution of incomes into two equal groups. One group represents those with income greater than the median and the other group represents those with income less than the median. Total number of units in the distribution includes those with no income.

Occupation - The occupation classification system consists of 503 specific occupation categories arranged into six summary and thirteen major occupation groups. This classification was developed to be consistent with the "1980 Standard Occupational Classification Manual" (SOC). The primary principles used in classifying occupations are: 1) the classification should realistically reflect the current occupational structure of the United States, and 2) an occupation should be classified on the basis of work performed.

Occupied Households - A housing unit is classified as occupied if it is the usual place of residence of the person or group of persons living in it at the time of enumeration/estimation, or if the occupants are only temporarily absent; e.g., away on vacation. The number of occupied households in 1985 for counties and state are provisional estimates.

Per Capita Income - Per capita income is the mean income computed for every man, woman, and child in a particular group. It is derived by dividing the total income of a particular group by the total population in that group.

Revenue - Revenue may be income from an investment or money collected by a government.

Government Revenues - Government revenues include all amounts of money received by a government from external sources, other than from issue of debt, liquidation of investments, and as agency and private trust transactions. This excludes noncash transactions such as receipt of services, commodities, or other "receipts in kind." Revenue is net of refunds and other correcting transactions.

Total Revenues for Education - Total revenues for education are those revenues generated through local, county, state and federal taxes. Some school districts may receive other sources or pensions, however those sources are not included here.

Sales Tax License - A sales tax license is a permit granted to persons, partnerships, corporations, or other organizations selling, renting, or leasing taxable items or performing taxable services in South Dakota. Applicants must obtain a sales tax permit for each place of business.

Standard Industrial Classification - Standard Industrial Classification (SIC) codes categorize all establishment-based federal economic statistics by industry. Industries are defined in accordance with the composition and structure of the economy. SIC codes are revised periodically to reflect the economy's changing industrial organization. Industry classification for employment by industry and taxable sales is based on the 1972 revision of the SIC codes.

Taxable Sales - Taxable sales are the portion of gross receipts of businesses, persons, or organizations who sell, lease, or rent tangible personal property or perform taxable services at retail in South Dakota upon which a sales tax is imposed. The industry classifications are based on the 1972 Standard Industrial Classification codes.

Unemployed - Those persons classified as "unemployed" include all civilians 16 years old and over who are a) neither "at work" nor "with a job but not at work" during the reference week, b) have been looking for work during the last 4 weeks, and c) are available to accept a job. Also included are persons who did not work at all during the reference week ~~and~~ are waiting to be called back to a job from which they have been laid off.

Unemployment Rate - The unemployment rate is the percentage of people in the civilian labor force who are classified as "unemployed."
